ADNAN RAHIM

Computer Science Graduate · AI and Software Engineer · Budapest, Hungary

rahim.adnanr@gmail.com | linkedin.com/in/adnan-rahim-565b90319 | github.com/rahim-adnan

ABOUT ME

I build intelligent systems that solve real problems. With hands-on experience in AI, computer vision, and data-driven automation, I focus on turning complex challenges into practical, scalable solutions that create real-world impact.

EDUCATION

BSc Computer Science *Sep 2022 – Feb 2026*

Eotvos Lorand University (ELTE) · Budapest, Hungary

- Awarded the Stipendium Hungaricum Scholarship for academic merit.
- Served as Demonstrator, co-facilitating workshops for first-year students.

PROJECTS

Autonomous Drone Control via Computer Vision

BSc Thesis · Python, OpenCV, Real-Time Systems

- Built a web-based control system for a real Tello drone that allows flight, live video streaming, face tracking, line following, and colour tracking directly from a browser without any extra software.
- Developed a real-time face detection pipeline that reads live camera frames, calculates face position, and automatically adjusts the drone's movement to keep the target in frame.

AI PDF Q&A — RAG Application

Personal Project · Python, Flask, React, LangChain, FAISS, Groq

- Full-stack app where users upload any PDF and ask questions in plain English using the RAG pattern.
- Used FAISS and HuggingFace embeddings for semantic search, with LLaMA 3.1 via Groq generating the final answers.

Tech Career Skill Tracker

Personal Project · Python, spaCy, BeautifulSoup, pandas, matplotlib

- CLI tool that reads a CV, scrapes live job postings, and produces a visual skill gap report.
- Detects 60+ tech keywords via NLP and outputs a colour-coded bar chart plus CSV export.

AI Research Tracker and AI Interview Coach

Personal Projects · FastAPI, Streamlit, Groq API, LLaMA 3, Pydantic, Render

- Research Tracker: fetches daily arXiv papers and summarises them locally using LLaMA 3, with no API key required.
- Interview Coach: generates role-specific interview questions and scores answers across five dimensions using a local LLM.

PROFESSIONAL EXPERIENCE

President, AI Development Club *Feb 2024 – Jul 2025*

ELTE University · Budapest, Hungary

- Organised 10+ technical workshops on Machine Learning, computer vision, and AI ethics for 50+ members.
- Led student teams in building and presenting three AI projects from concept to completion.

Front-End Web Developer Intern *Oct 2024 – Dec 2024*

Limelight Renhold AS · Oslo, Norway (Remote)

- Developed responsive front-end interfaces using modern JavaScript, focusing on clean structure, accessibility, and smooth performance across devices.
- Improved existing codebase by refactoring outdated components, reducing load times and making future updates easier to maintain.

International Student Ambassador *2024 – 2025*

ELTE University · Budapest, Hungary

- Represented ELTE at school visits and educational events, speaking with prospective students about university life and admissions.
- Featured on the ELTE official website as part of the student ambassador programme.
- elte.hu/en/meet-our-students/adnan-rahim

Learning Methodology Demonstrator *Sep 2023 – Jul 2025*

ELTE University · Budapest, Hungary

- Assisted in delivering the Learning Methodology course for incoming students.
- Supported students in adjusting to university life, offering guidance on study habits and academic expectations.

International Student Mentor *Jul 2024 – Dec 2025*

HOOK · Hungary

- Mentored international students through their first semester, covering cultural and academic integration.
- Organised orientation events and peer support groups to help build a welcoming student community.

TECHNICAL SKILLS

Languages	Python (Advanced) · JavaScript · SQL · HTML/CSS
Concepts	OOP · Algorithms & Data Structures · REST APIs · Cloud Deployment
AI / ML	OpenCV · LangChain · FAISS · HuggingFace · spaCy · NumPy · Pandas · RAG
LLM and Local AI	Ollama · LLaMA 3 · Groq API · Prompt Engineering · Vector Embeddings
Web and APIs	Flask · FastAPI · Streamlit · React · REST APIs
Data	BeautifulSoup · pandas · matplotlib · seaborn
Tools	Git · GitHub · Linux CLI · Pydantic · Render · Streamlit Cloud
